### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The IDS of 5/10/2004 is clearly erroneous and not considered as a result. See title, inventor and SN of page 1 vs. page 3.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The sidewalls are --transverse to the base walls-- in order to be generic to claims 2-3.

Claim 5 is vague since no maximal deformation path is defined. Perhaps claim 5 could be amended to state that the arch extends in a central portion of the base wall and that a distance from the opposite base wall is shorter than a distance between the base walls.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3612

5. Claims 1-2, 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by any one of Zimmerle, Daimler-Benz AG, Walter, Lura, Wilson, and Bovard et al..

6. Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Lura.

See the arch at 29, 31.

7. Claims 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Walter.

See the base wall curved inwardly at 13 in an arch, closer to the opposite base wall 7 than is the remainder of the base wall.

8. It seems hardly necessary, but should applicant traverse the above self-evident rejections, further rejection is made as follows:

***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 1-6 are selectively rejected under 35 U.S.C. 103(a) as being unpatentable over Zimmerle, Daimler-Benz AG, Walter, Lura, Wilson, and Bovard et al. as described above.

The use of steel material for bumper impact absorption is common knowledge in the art, obvious to use in view of the strength to weight ratio of steel.

***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kroning et al is cited to show further tubular impact absorbers.
